VISA SECURE

Visa Secure EMV® 3DS 2.0 Access Control Server Certificate Request Form

Refer to the below checklist and guide to request for a new or replacement Visa Secure EMV® 3DS 2.0 ACS RSA Connectivity certificate:

By ticking the boxes below, you agree to comply to the pre-requisite items:

☒ **Visa EMV 3DS Product Testing is mandatory for every version of the EMV 3DS protocol**. By ticking the box, you agree to provide the copy of the Visa-issued Product Compliance Letter from the Certificate Owner named after this request form.

Note: To confirm the validity of your Visa EMV 3DS Product Compliance certification, refer to the **Visa's EMV 3DS Compliant Product List** from the Visa Secure Services **website.**

For concerns or questions related to your Visa EMV 3DS Product Compliance (re)certification, contact the **Global Client Testing 3DS Support at gctv3dsts@visa.com**.

☒ The CSR included on this request is using the following **minimum key requirements** and all its required fields such as Common Name, Organization Name, Organizational Unit, Locality, State and Country (2-letter ISO code) are included. Also, the Locality is not abbreviated, and the email address field is kept blank.

Key Type	Required Key Size and Signature Type
RSA	**SHA-256 with at least 2048-bit key length**

Refer to the table below for the certificates normally required for ACS endpoint functionality. As an important requirement, each client is encouraged to request one set of ACS certificates (a Server, Client & Signing certificate) for the seamless and effective functioning of your connection to the Visa Directory Server:

- Select only one (1) certificate type per request form.
- Selection of certificate type is based on endpoint platform configuration and capability.

Certificate Type	Certificate Function	Standard Common Name Format
EMV ACS RSA Connectivity Server Only	Connectivity with DS • AReq/ARes flow	Fully Qualified Domain Name or IP Address (No Private IP or IP range). Do ensure that the FQDN (ACS Server URL) or IP can be resolved to the IP address of the ACS Server.
EMV ACS RSA Connectivity Client Only	Connectivity with DS • RReq/RRes flow	Visa Secure ACS Client _<Host BID> (e.g., Visa Secure ACS Client_12345678) OR Visa Secure ACS Client _<Host BID>_<Issuer BID – if available> (e.g., Visa Secure ACS Client_12345678_87654321)
EMV ACS RSA Signing	Used by ACS to sign content between the ACS and the 3DS SDK to prepare for a challenge flow	Visa Secure ACS Signing_<Host BID> (e.g., Visa Secure ACS Signing _12345678) OR Visa Secure ACS Signing_<Host BID>_<Issuer BID – if available> (e.g., Visa Secure ACS Signing_12345678_87654321)

To request for an expedited certificate, kindly reach out to us using our official mailbox: Certificates@visa.com.

For the detailed Visa Secure Implementation Documents, please visit the Visa Secure Services website or Visa Secure Documentations page accessible through your Visa Access.

For any implementation related concerns or adding a new domain to the DS allow list (for server endpoint types), kindly contact your dedicated Visa Representative or any of the Regional Customer Support Teams:

- **AP, CEMEA, LAC & EU regions:** Send an inquiry through Visa Support Hub from your Visa Access account)
- **US/CANADA** (ESupport@visa.com)

Visa Secure EMV® 3DS 2.0 Access Control Server Certificate Request Form

Provide the required information in the following fields. Any missing information may result in processing delays.

1. **Client Information:** Includes all relevant business information for the certificate owner and/or Hosting Solution Provider requesting for the certificate.

2. **Authorized Contact Registration:** A minimum of two Authorized Contacts are required. One technical contact and one business contact from the certificate owner's organization must be provided. The listed contacts will receive the signed certificate and any future notification regarding the certificate including but not limited to certificate expiry, revocation and/or suspension.

3. **Certificate Signing Request (CSR)**

   - **Environment Type:** Select only one (1) per request. Options are Production or Pre-Production (CTE 2).
   - **Request Type:** Select only one (1) per request. Options are New or Replacement. Use Replacement if the reason for request is any of the following: existing certificate expiry (expiry date must be indicated), changes in the DN information, upgrade, missing private key, compromised key, etc.)
   - **Certificate Type:** Select only one (1) per request. Certificate type is based on platform's capability. Please refer to page 1.
   - **Digital Certificate Subject DN Information:** DN information must reflect exactly what is generated in the CSR.
     - Effective 1 September 2022, the Organizational Unit (OU) field will be prohibited in all TLS Server certificates issued by any Public Trusted CA, including DigiCert, Visa eCommerce CA, or any other Public Trusted CA. **Please ensure to keep OU field empty for any server certificate request.**
   - **CSR Code:** Paste the generated CSR in the text box provided.

IMPORTANT: **Sign the request form (either by digital signature or physical signature) and email to** Certificates@visa.com

Digital Signature	Physical Signature
For this signing method, the digital signature must be **issued by a publicly trusted Certificate Authority** such as DigiCert, Sectigo and the likes.	For this signing method, please **print and sign the completed form, scan the signed form (including all its pages), and send both the MS Word document and the PDF-scanned copy formats** of the form.

Reminder: As per CA/Browser Forum Baseline Requirements for the Issuance of SSL/TLS Server certificates and Visa Certificate Practice Statement, a Domain/IP Address validation is required before issuing a server certificate.

For further details, you may visit our Certificate Request Process web page from your Visa Access account.

Visa Secure EMV® 3DS 2.0 Access Control Server Certificate Request Form

Subscriber Agreement

The End-Entity Subscriber agrees that it will:

1. Provide accurate and complete information to the Visa CA, both in the certificate request and as otherwise requested by the Visa CA in connection with the issuance of the Certificate(s) to the supplied by the Visa CA.

2. Take reasonable measures to maintain sole control of, keep confidential, and properly protect the Private Key that corresponds to the Public Key to be included in the requested Certificate(s) (and any associated activation data or device, for example, password or token) in accordance with Chapter 6, Technical Security Controls, Visa Public Key Infrastructure Certificate Policy Statement (CPS).

3. Review and verify the Certificate contents for accuracy.

4. Install the Certificate only on servers that are accessible at the subjectAltName(s) listed in the Certificate, and to only use the certificate in conjunction with a Visa product or service and to use the Certificate solely in compliance with applicable laws and solely in accordance with Appendix A: Subscriber Agreement or Terms of Use Agreement, Visa Public Key Infrastructure Certificate Policy Statement (CPS).

5. Promptly cease using a Certificate and its associated Private Key, and promptly request the Visa CA to revoke the Certificate using the procedures described in "Certificate Revocation and Suspension", in the event that: (a) any information in the Certificate is, or becomes, incorrect or inaccurate, or (b) there is any actual or suspected misuse or compromise of the Subscriber's Private Key associated with the Public Key included in the Certificate.

6. Promptly cease use of the Private Key corresponding to the Public Key included in the Certificate upon revocation of that Certificate for reasons of Key Compromise or expiry.

7. Respond to the Visa CAs instructions concerning Key Compromise or Certificate misuse within one (1) Visa business day for the relevant geographical location.

8. Visa-Issued certificates may be used only in conjunction with Visa products and services.

9. Acknowledge and accept that the Visa CA is entitled to revoke the certificate immediately if the Applicant were to violate the terms of the Subscriber or Terms of Use Agreement or if the Visa CA discovers that the Certificate is being used to enable criminal activities such as phishing attacks, fraud, or the distribution of malware.

NOTE: Visa CAs conform to the Baseline Requirements for the Issuance and Management of Publicly-Trusted Certificates published at https://cabforum.org/baseline-requirements-documents/. The Baseline Requirements list all allowable options while Visa Certificate Practice Statement (CPS) published at https://usa.visa.com/legal/visa-public-key-infrastructure.html governs the management and operations of Visa's Public Key Infrastructure. Both Baseline Requirements and Visa Certificate Practice Statement (CPS) may change without prior notice.
